

# Solar Inverter cost vs benefit calculation in Finland

Are there governmental auctions for solar PV in Finland?

No governmental auctions or tender schemes have been arranged for solar PV in Finland. The new support system for renewable electricity currently in the parliamentary process will also be applicable to solar PV. It will be a premium-based PPA auction arranged by the State of Finland.

What is the job outlook for solar PV companies in Finland?

The volume of PV installations in Finland is still low, but it is growing rapidly, employing more people. There are several companies working with power electronics systems for solar PV. It is probably the most significant individual PV-related employer in companies. The tasks include R&D and manufacturing.

What is the largest solar PV plant in Finland?

The largest solar PV plant in Finland is a 3.6 MW ground-mounted system, which is constructed on an industrial site in Nurmo. The majority of systems are built for self-consumption of PV electricity, since there is no economic potential for utility-scale PV systems for grid electricity generation yet.

How many kW can a PV system produce a year?

It is estimated by a major PV installer in Finland that the capacity of domestic stand-alone PV systems sold yearly is around 300 kW. If data are reported in AC, please mention a conversion coefficient to estimate DC installations.
