

# Standalone energy storage supplier quotation in Guernsey 2026

What is the energy strategy for Guernsey?

The Electricity Strategy for Guernsey covers the period up to 2050. The Committee for the Environment & Infrastructure considered several different ways in which Guernsey could meet its future demand including solar, wind, tidal, additional interconnectors, energy storage and alternative fuels.

Does Guernsey have electricity?

It was proposed that Guernsey Electricity would continue to supply all islanders (both domestic and commercial) with electricity through the network, but that competition be introduced in all other sectors of the market meaning the way in which electricity is sourced to meet customers demands would change.

What does energy independence mean for Guernsey?

Greater energy independence- A system where a greater and significant proportion of our community's energy needs are supplied through local energy sources. This will increase resilience by reducing exposure to external and geopolitical factors. The Committee for the Environment & Infrastructure is developing an Electricity Strategy for Guernsey.

What is Guernsey's energy policy?

The main work streams within this policy are the formulation of an overarching Energy Policy for Guernsey which will inform future work in relation to the supply of hydrocarbons and the use of renewable energy.

Does Guernsey Electricity need a 'accounting unbundling' exercise?

Guernsey Electricity will be required to undertake an 'Accounting Unbundling' exercise which involves separating the accounts associated with various activities undertaken within the business. This is needed to ensure transparency and fairness within the market.

How can Guernsey support a vibrant economy?

Supporting a vibrant economy - A clean, reliable, and affordable energy supply is a fundamental economic enabler. Establishing an environment for the development of on-island (including offshore) renewables will support the diversification and vibrancy of Guernsey's economy.

We need energy storage in the form of home and business battery systems, utility-scale storage, and we need to produce hydrogen, which is a great store for renewable energy when in energy ...
