

# Successful bid price of LFP battery system project in Greece 2026

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

How many companies have won government support for a battery project?

Seven companies have won government support for 11 standalone battery projects at Greece's second energy storage auction, where 300 MW was offered.

Where does LFP spot price come from?

LFP spot price comes from the ICC Battery price database, where spot price is based on reported quotes from companies, battery cell prices could be even lower if batteries are purchased in high volume. Estimated cell manufacturing cost uses the BNEF BattMan Cost Model, adjusting LFP cathode prices with ICC cathode spot prices.

How many energy projects did Helleniq & Intra Energy bid for?

Helleniq Energy and Intra Energy (Intrakat) are each behind three of these 12 projects, PPC Renewables bid successfully for two projects, while Aenaos (Mytilineos), Energiaki Techniki Anaptyxiaki, Energy Bank, and one energy community bid successfully for one energy storage project each.

That trend is expected to continue. In 2026/27, the average pack price is expected to fall below \$100/kWh, based on raw material costs, competition, and pressure from alternative technology such as Na-ion ...

The deadline for bid submissions is set for 23 December 2024, with connection applications due by 31 January 2026. The bidding price for projects is capped at 145,000 euros ...

SK On may start mass producing LFP batteries for automakers in 2026 - executive. South Korea's SK On plans to start mass producing lithium iron phosphate (LFP) batteries as early as 2026 to supply several automakers as it ...

Tesla is charging toward a major milestone in its quest for battery dominance. On June 28, 2025, the company announced that its first North American lithium iron phosphate (LFP) battery manufacturing facility, located in ...

Tesla will likely implement the LFP 4680 battery using the 2025/015194 A1 process in two phases: pilot production by late 2025, followed by volume production in early ...

## Successful bid price of LFP battery system project in Greece 2026

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

According to a recent report released by Goldman Sachs, the global average battery price has dropped from \$153/kWh in 2022 to \$149/kWh in 2023. Goldman Sachs predicts that by the end of this year, the price is expected to fall to ...

LG to Produce LFP Batteries for ESS in USA LG Energy Solution plans to start mass production of lithium iron phosphate (LFP) batteries for energy storage systems (ESS) in the United States in the second half of ...

The Energy Regulatory Authority has been approving numerous energy storage projects recently. Image: Energy Regulatory Authority headquarters, credit: Energy Regulatory Authority. Swathes of energy storage ...

Now, battery metal prices have started to fall, and by 2030, about 40% of the reduction in battery costs will come from the decline in battery metal prices. LFP battery market ...

Sustainable LFP battery waste management Sustainable and efficient battery recycling is essential for the European Li-ion battery value chain and aligns with the Battery ...

In this context, the EU-funded Battery2Life project aims to transform used batteries into valuable assets by revolutionising battery system designs and management. By introducing adaptable ...

Both projects will be completed in 2025 and will utilise lithium iron phosphate (LFP) battery technology. The two projects were part of a total of 12 totalling c.400MW that ...

Initially, the tender aimed to support 300 MW but follows the successful award of 411.8 MW and 299.8 MW of storage capacity in Greece's first and second rounds, respectively.

ReLiFe Project will eventually pave the path for the successful commercialization of an industrial scale LFP recycling plant, which will cover EU's raw material requirements for battery cells manufacturing and supply 1.5% of lithium ...

Regardless, higher adoption of LFP chemistries, continued market competition, improvements in technology, material processing and manufacturing will exert downward pressure on battery prices," said Yayoi ...
