

# Successful bid price of Solar Panel project in Spain 2025

How much will Spain spend on solar panels in 2021?

As you may already know, the Spanish government has approved an aid package for solar panel grants, setting aside up to 1,320 million euros in 2021 (Royal Decree 477/2021). This plan consists of a nationwide distribution of investment to promote self-consumption, storage, and air conditioning installations with renewable energies.

What's happening in Spain's solar market?

Download the full report to stay ahead in this rapidly evolving market. With Spain's solar market remaining a crucial topic, don't miss your free ticket for Solar & Storage Live España 25-26 June 2025. Spain's solar energy sector has surged to 22.45 GW of capacity by early 2023, with ground-mounted solar farms driving 77% of new installations.

What are the alternatives to solar power in Spain?

Alternatives such as power purchase agreements or going to the spot market were more attractive with current high prices and developers looking for other ways to build new solar PV plants, as the appetite to invest in renewable energy is still going strong in Spain, according to Donoso.

Is solar energy a renewable resource in Spain?

Although wind is currently the most used renewable resource in the Mediterranean country, solar energy is growing at a very fast pace. In fact, the solar capacity installed has more than quintupled in the last five years. In 2023, Spain was the sixth country worldwide in terms of new capacity additions.

Why are there no solar projects in Europe?

The increased appetite for PV projects to go merchant given the high wholesale prices across Europe is one of several factors that can explain the lack of solar awarded in the fourth round, according to Alejandro Zerain and Alexandre Danthine, senior associates at consultancy Aurora Energy Research.

Why is there no solar power in Spain?

Another reason for the lack of solar capacity awarded is due to supply chain disruptions that are affecting developers in Spain, with bottlenecks and longer order cycle times for acquiring components, say Zerain and Danthine.
