

Successful bid price of residential ESS project in

What happened to ESS bid prices in March 2024?

In March 2024, ESS bid prices varied depending on their storage capacity, with an overall downward trajectory evident, particularly in the case of four-hour ESS bids, which hit yet another all-time low. Raw material prices for storage battery are expected to remain stable. At the outset of 2024, battery prices experienced a decline.

How much is a 'solar + 4 hour ESS' tariff?

The latest reverse auction has resulted in a record low tariff of Rs 3.32 per unit for a "Solar +4-hour ESS". This tariff was achieved in a tender by SJVN Ltd for a project that includes 1200 MW of solar power combined with 600 MW/2400 MWh of energy storage.

How much does a Bess project cost a month?

as also made projects more economically viable. In recent auctions, BESS tenders in Maharashtra (August 2024, 300 megawatts (MW)) and Rajasthan (November 2024, 500 MW) secured monthly tariffs as low as Rs 219,001-221,100/MW (US\$2,561-\$2,586/MW/month), representing almost a 40% reduction compared

How important is co-located ESS in a solar project?

A February 2025 notification by the Ministry of Power (MoP) further emphasizes this importance by mandating a minimum of 2-hour co-located ESS, equivalent to 10% of the installed solar project capacity, in future solar tenders.

What makes a successful bid?

A successful bid not only secures a project but also sets the foundation for profitability throughout the construction process. One of the key aspects of effective bidding is accurately estimating costs. Contractors need to carefully analyze all the elements involved in the project, such as labor, materials, equipment, and overhead expenses.

What is sjvn's new solar energy tariff?

This tariff was achieved in a tender by SJVN Ltd for a project that includes 1200 MW of solar power combined with 600 MW/2400 MWh of energy storage. This newly discovered tariff is approximately 5.8% lower than a similar tender auctioned by SECI in December 2024.
