

Successful bid price of standalone energy storage project in India 2026

Which energy storage system projects are gaining attention in India?

Standalone energy storage system (ESS) projects in India are gaining more attention as they account for 64% of the total tenders issued in Q1.

How has VGF impacted battery ESS issuance in 2024?

"This capacity, issued across 11 tenders in just three months has already surpassed the total issuance in 2024. The Viability Gap Funding (VGF) scheme, which offers up to 30% support for capital expenditure of standalone Battery ESS (BESS) projects, has primarily driven this acceleration," said the report by JMK Research.

What is India's Viability Gap Funding (VGF) scheme?

India's viability gap funding (VGF) scheme, which offers up to 30% support to project developers for capital expenditure on standalone BESS projects, has been a key driver of the surge in Standalone ESS tenders.

How much does Bess cost in 2024?

In recent auctions, BESS tenders in Maharashtra (August 2024, 300 megawatts (MW)) and Rajasthan (November 2024, 500MW) secured monthly tariffs as low as Rs219,001-221,100/MW, representing almost a 40% reduction compared to non-VGF projects with similar specifications. Central and state agencies continue to play a crucial role in scaling deployment.

When complete in 2026, this 220-megawatt battery energy storage center at the site of DTE's retired Trenton Channel coal power plant is expected to be the largest standalone battery energy storage project in the ...

India's power sector is witnessing a significant transformation, driven by the rapid integration of variable renewable energy into the grid. This transition has disrupted traditional load patterns, creating an urgent need for ...

China is exploring new financial models to support the development of stationary energy storage powered by wind and solar energy (i.e., "wind and solar power + energy storage"), by ...

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy storage ...

The Solar Energy Corporation of India (SECI) has invited bids to set up 1,000 MW/2,000 MWh standalone battery energy storage systems in India under tariff-based global competitive bidding. The last date for the submission ...

Successful bid price of standalone energy storage project in India 2026

Request for Selection (RfS) Document for setting up of Pilot Project of 250 MW/500 MWh Standalone Battery Energy Storage Systems in Telangana under Tariff-Based Global ...

3 ???· The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

The rising demand for Standalone ESS is drawing both established players like JSW Energy, Greenko, and Torrent Power, as well as new entrants such as Pace Digitek, ...

The VGF, combined with energy storage obligations and bidding guidelines for energy storage projects--whether standalone or integrated with renewable energy--is expected to advance the country's energy storage ...

1.1.4 The Ministry of Power (MoP), Government of India has issued "Guidelines for Procurement and Utilization of Battery Energy Storage Systems as part of Generation, Transmission and ...

Government of India (GoI) set a new target of 500 GW of non-fossil fuel-based capacity by 2030 and is pursuing different programs for large scale renewable energy (RE) projects and already ...

Executive Summary The rapid expansion of renewable energy has both highlighted its deficiencies, such as intermittent supply, and the pressing need for grid-scale energy storage ...

Solar and wind power supply fluctuates, Energy storage systems (ESS) play a crucial role in smoothening out this intermittency and enabling a continuous supply of energy when needed. Thus, for sustainable renewable energy ...

This price rationalisation is expected to lead to the realization of sustainable IRR for projects, which should ideally reduce the currently high cancellation rate of tenders and improve lender ...

India's recent energy storage auctions have yielded record-low prices, with unsubsidized standalone battery storage bids at INR2.8 lakh/MW/month and solar-plus-storage bids ranging from INR3.1 to INR3.5/kWh, according to a ...

The successful bidder will be awarded the project and will be responsible for the delivery of the contracted capacity, as outlined in the Battery Energy Storage Purchase Agreement (BESPA). The total contracted capacity ...
