

Successful bid price of utility scale ESS project in Finland 2025

How does the Finnish TSO respond to the growing number of renewable installations?

The Finnish TSO, Fingrid, is continuously taking measures to respond to the fast-growing number of renewable installations. The power system is getting more complicated both from a technical and commercial perspective, with many large changes occurring simultaneously both in electricity production and consumption.

How does Vres affect Finnish electricity supply?

The decrease in dispatchable power generation from thermal power plants using stored fuels and the increase in the amount of electricity generated by VRES leads to a decline in the flexibility of the Finnish electricity supply. As a result, it becomes more challenging to ensure that supply and demand always match.

How many up-regulation bids can be submitted?

Restricted amount, five up-regulation and five down-regulation bids below 5 MW but above 1 MW can be submitted if an electrical order is used. The TSOs in the joint Nordic system have agreed on obligations for maintaining reserves for different products.
