

# Successful bid price of warehouse solar storage project in Italy 2030

How much will Italy invest in utility-scale storage?

In support of these ambitious objectives, the Italian government recently received approval from the EU Commission for investment schemes aimed at developing at least 70 GWh of utility-scale storage--an initiative projected to attract over EUR17 billion in investments over the next decade.

Are battery storage projects a good investment?

Battery storage projects have a wealth of opportunities to target, from ancillary services to capacity markets to energy trading, and developers are now positioning projects to best take advantage of these. The grid-scale energy storage market in Italy is set to become one of the most active in Europe having been close to non-existent until now.

Is Bess a good investment in northern Italy?

While Northern Italy currently has the largest installed BESS capacity in the country, a build-out of RES in the South is increasing energy price volatility, creating a more compelling investment case for BESS in this region.

On Feb. 26 Terna announced the results of its capacity market auction, allocating 43 GW for the delivery year 2027, for more than EUR1.847 billion. Industry insiders expect that battery storage projects have accounted for ...

With these mechanisms, Italy aims to accelerate its clean energy transition while maintaining financial stability. How will the scheme help Italy expand its renewable energy capacity? The EUR9.7 billion state aid scheme ...
