

# Total investment cost of modular ESS container project in Philippines

How much does a modular container house cost in the Philippines?

For a more accurate estimate, consider reaching out to us. On average, modular container houses in the Philippines can cost anywhere from Php 19,000 to Php 35,000 per square meter. This price range is relatively affordable compared to traditional standard housing, which typically falls within the range of Php 25,000 to Php 50,000 per square meter.

Why should you buy a prefabricated container house in the Philippines?

This prefabricated nature reduces both material waste and construction time. For example, a low-cost prefab container house in the Philippines can be built for a fraction of the price of conventional homes, making homeownership more accessible, especially for those on a tight budget.

How much does a prefabricated container house cost?

It is made of steel that can withstand strong winds and extreme weather conditions. This is the most affordable prefabricated container house with a price ranging from 190,000PHP to 220,000PHP. Price fluctuations within this range can be attributed to factors such as the choice of materials, overall quality, column thickness, and flooring options.

Are container houses expandable?

Additionally, many container homes are designed to be expandable, allowing owners to add more containers or modules as their space requirements grow. The modular nature of container houses means they can be relocated or reconfigured with relative ease. This flexibility makes them suitable for various uses beyond permanent residences, such as:

How much do installation fees cost?

Installation fees will vary depending on your location but typically start at 20,000 PHP. It's important to note that installation fees do not cover plumbing, electrical work, structural excavation, or general requirements. For a more accurate estimate, consider reaching out to us.
