

# Turnkey home energy storage EPC contract price in Greece

Do I need an EPC if I buy a house in Greece?

If you're buying a home in Greece, it's not your responsibility to get an EPC. The responsibility goes to the owner. The certificate is necessary in order to sell or rent out a building that is more than 50 square meters. Estate Agents in Greece are also obliged to list the energy efficiency class of a property on sale or rental advertisements.

What is an EPC in Greece?

"Energy Label" is another word used for EPCs and means the same thing. EPC's apply to all buildings including residential buildings, offices, and warehouses, but for the sake of simplicity, we'll focus on EPC's for residential buildings. Do I Need an EPC to Build or Own in Greece?

What is an Energy Performance Certificate (EPC)?

What is an EPC? "Energy Performance Certificates", simply put, measure the energy efficiency of buildings in Greece. "Energy Label" is another word used for EPCs and means the same thing.

How do you know if a building is energy efficient in Greece?

In Greece, the letters will be in Greek as in the chart below (A+, A, B+, B, ?, ?, ?, ?). A+ is the highest possible rating. Without going into too many details, the score is determined by comparing a building's energy use compared to a building with "ideal characteristics" - in other words, a building with near perfect energy efficiency.

How long does an EPC last?

An EPC is calculated from a number of factors, like the construction materials, the type of boiler, insulation, and heating systems. Once an EPC is issued, it lasts for a period of ten years. Which Category am I Likely In? These are mainly for modern buildings constructed after 2012.
