

Turnkey residential solar battery EPC contract price in Canada

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

How does solar EPC conduct business?

From employees to vendors to business partners, Solar EPC conducts business fairly, impartially and ethically. Our goal is to be our customers' preferred supplier into each successive project. To reach our goal we must deliver an excellent quality product, on time, every time.

What happens if EPC agreements are terminated?

If the EPC agreements are terminated then SolarBank will not realize the full contract value. The development of any Project is subject to receipt of required permits and the continued availability of third-party financing arrangements for the Investors.

Which provinces are seeing a significant increase in solar capacity?

Other provinces, such as Saskatchewan and Quebec, are also seeing significant increases in solar capacity as they aim to reduce their carbon footprint and meet renewable energy targets. By 2023, solar energy accounts for approximately 4 GW of installed capacity nationwide.

Should a principal accept a solar facility?

Lenders will, generally speaking, be prepared to accept a solar facility that provides sufficient income to service the debt. However, in addition to covering the debt service obligations, the Principal (and the Principal's equity sponsors) will also want to receive a return on their equity investment and satisfy the requirements of any PPA.

Canadian Solar's EPC will deliver the best LCOE, incredible performance and all in excellent quality, and help to ensure your project is delivered on time, on budget and with the high ...
