Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

What is the scope of a solar EPC contract?

Scope will include supply and handling of SPV modules, grid tie solar inverters, cables, structures, civil work and electrical balance of system. What is a bankable EPC contract?

A bankable EPC Contract is a contract with a risk allocation between the Contractor and the Project Company to the satisfaction of Lenders and their credit committees.

What is an EPC contract?

An EPC Contract delivers these requirements in a single integrated package, which is one of the major reasons why EPC Contracts are the most common form of construction contract used in project-financed utility-scale solar projects. The key clauses in any construction contract are those that impact on time, cost and quality.

What happens if the EPC contract is uncertain?

Any uncertainty in the EPC Contract may unfortunately see the Contractor liaising directly with these third parties and possibly risking the relationship of the Project Company with key influencers, customers and long-term neighbours.

Do EPC contracts eliminate or mitigate risks?

EPC Contracts do not eliminate or mitigate against all risks; however, when drafted correctly they can ensure performance, timely delivery and rectification within agreed parameters or up to agreed caps. For this reason, we recommend advice on a project-by-project, contract-by-contract basis.
