

Turnkey utility scale ESS EPC contract price in Mexico

What is Mexico power EPC market?

Market Overview Mexico Power EPC Market refers to the market for Engineering, Procurement, and Construction (EPC) services in the power sector in Mexico. EPC services are essential for the development of power projects, including power plants, transmission lines, substations, and other power infrastructure.

What are EPC services?

EPC services are essential for the development of power projects, including power plants, transmission lines, substations, and other power infrastructure. These services involve the entire lifecycle of a power project, from its conceptualization and design to procurement and construction.

What is an EPC agreement containing Bess project performance guarantees?

An EPC agreement containing BESS project performance guarantees will contain detailed testing procedures as well as provisions for liquidated damages in the event that a constructed BESS project is unable to pass applicable performance testing.

What is an example of an EPC contract?

For example: From an income tax perspective, performing work under an EPC contract may result in the creation of a permanent establishment of the Contractor in Mexico, which would allow the Mexican government to tax any income attributable to the Contractor's work on the Project.

What happens if the EPC contract is uncertain?

Any uncertainty in the EPC Contract may unfortunately see the Contractor liaising directly with these third parties and possibly risking the relationship of the Project Company with key influencers, customers and long-term neighbours.

What is a performance specification in an EPC contract?

Performance specification: Unlike a traditional construction contract, an EPC Contract usually contains a performance specification. The performance specification details the performance criteria that the Contractor must meet. However, it does not dictate how they must be met. This is left to the Contractor to determine.

As evidence of this trend, the Mexican government plans to arrange for the construction of 18 new projects in the power generation sector alone (two wind, two geothermal, two hydro, and 12 ...
