

What are Italy's energy storage goals?

Energy Storage Goals: To balance the grid with increased renewable energy, Italy targets 11 GW /58 GWh of grid-scale energy storage capacity by 2030, requiring substantial investment and development.

How much Bess capacity will Italy have by 2030?

That is why Italy aims to add 15GW of BESS capacity by 2030 (of which 11GW should be standalone and 4GW co-located). As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW).

How many energy storage projects are being developed in Italy?

The energy storage owner-operators had initially announced in February 2024 their partnership to develop three projects with a total combined capacity of 400 MW. This expansion brings their joint project development pipeline for utility-scale BESS in Italy to 2.9 GW across Italy's North and South electricity zones.

How much energy storage capacity does Italy have?

As of November 2024 Italy had 5.1 GW/11.7 GWh of energy storage capacity. This is almost exclusively small-scale residential system, with utility-scale storage systems providing just 864 MW. To help achieve the target for utility-scale storage build-out, the Italian government has implemented the MACSE subsidy scheme as supporting legislation.

How does Italy guarantee a long-term supply system of new storage capacity?

The Italian legislator has acted to guarantee a long-term supply system of new storage capacity by introducing a mechanism based on competitive, transparent and non-discriminatory auctions. The system recognises the right to an annual remuneration, in exchange for the provision of the awarded capacity as part of the national energy market.

How does Italy's electricity market work?

Zonal Market Dynamics: Italy's electricity market is a zonal market, with seven geographic zones affecting short-term price volatility and influencing BESS investment strategies. MACSE Subsidy Scheme: The new MACSE scheme offers 15-year contracts for energy storage projects and guarantees indexed linked revenue.

Jinko ESS has announced that it has secured 5MWh grid-scale energy storage projects in Italy, marking its official entry into the country's utility-scale storage market. The ...

Solar and wind power supply fluctuates, Energy storage systems (ESS) play a crucial role in smoothing out

this intermittency and enabling a continuous supply of energy when needed. Thus, for sustainable renewable energy ...

Botswana has received an \$88 million loan from the World Bank for its first utility-scale battery energy storage system (BESS). The 50 MW/200 MWh project will allow for the stable integration and management of renewable ...

The purpose of this thesis is to investigate the structuring and financing conditions of utility-scale renewable energy in Italy, with a focus on solar PV and onshore wind, and suggest possible ...

**Key Findings** Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the ...

Egypt's first utility-scale battery, Africa's biggest solar-plus-storage project underway Two major announcements within just five days signal the rapid acceleration of ...

The majority of newly installed large-scale electricity storage systems in recent years utilise lithium-ion chemistries for increased grid resiliency and sustainability. The capacity of lithium ...

The BRPL BESS project is the first commercial standalone BESS project at the distribution level in India to receive regulatory approval for a capacity tariff and will play a pivotal role in facilitating the uptake of low-cost ...

These developments are propelling the market for battery energy storage systems (BESS). Battery storage is an essential enabler of renewable-energy generation, helping alternatives ...

Conventional utility grids with power stations generate electricity only when needed, and the power is to be consumed instantly. This paradigm has drawbacks, including ...

The Danish infrastructure investor has joined hands with GCSS to develop the pipeline of large-scale, standalone battery energy storage projects across both northern and southern Italy.

The BRPL BESS project is the first commercial standalone BESS project at the distribution level in India to receive regulatory approval for a capacity tariff and will play a ...

Partners' pipeline of mid-stage BESS projects in Italy now stands at 14 projects and 2.9 GW 21st November 2024, Z&#220;RICH/MILAN -- BW ESS and ACL Energy have announced a significant expansion of their joint ...

The Italian legislator has intervened, specifically in the development of storage capacity, by introducing a

long-term procurement system of utility-scale storage capacity based ...

Such challenges are minimized by the incorporation of utility-scale energy storage systems (ESS), providing flexibility and reliability to the electrical system. Despite the ...

Analyst Bloomberg New Energy Finance (BNEF) has published a report illustrating rising interest in utility-scale BESS among Australian energy companies and coal-fired generator owners, thanks to improving battery ...
