

Although most utility-scale "Solar + ESS" tenders issued so far are technology-agnostic, the requirement for solar co-location, along with a short commissioning timeline of 24 ...

Standalone Energy Storage Systems (ESS) are becoming the backbone of India's utility-scale ESS auctions, accounting for 64% of the total tenders issued between January and March 2025 alone, according to a new ...

A report by JMK Research in 2023 commented on the rise of grid-scale energy storage systems (ESS) via demand-driven tenders, and how this was becoming important for the grid integration of renewables.

CGN New Energy has selected seven winners from 50 bidders in its 10 GWh battery energy storage system (BESS) tender, with the lowest bid at CNY 0.458/Wh (\$63/kWh).

The commissioning is a new development for utility-scale BESS in Malaysia. The country is turning to energy storage and other forms of renewables to meet its population's growing demand for power.

Following a brief consultation in late February, the Greek government has unveiled a new battery storage program targeting 4.7 GW of utility-scale, standalone projects which will be given a priority connection and ...

According to Bloomberg estimates cited in the report, battery prices could decline further to about USD 112 per kWh by the end of 2025, potentially driving future Solar + ...

India's Standalone Energy Storage Systems (ESS) are becoming the backbone of India's utility-scale ESS auctions, accounting for 64% of the total tenders issued between ...

The ability to replicate successful tender types and introduce novel tender designs will define the trajectory of utility-scale renewable energy tendering in India. SECI's ...

Discover the true cost of commercial battery energy storage systems (ESS) in 2025. GSL Energy breaks down average prices, key cost factors, and why now is the best time ...

A list of battery projects owned or operated by Australian electricity retailers. Image: BloombergNEF The "2025 Australia Energy Storage Update" report forecasts utility-scale BESS deployment of 2.3 GW, in 2024, in ...

In 2016, the National Renewable Energy Laboratory (NREL) published a set of cost projections for utility-scale lithium-ion batteries (Cole et al. 2016). Those 2016 projections relied heavily on ...

You will need to send an email to tender@blackridgeresearch to submit a tender in our database. Our team will share the submission guidelines to ensure your tender is live in our ...

U.S.-based Fluence Energy has launched its latest grid-scale battery energy storage system (BESS) solution Smartstack, featuring an innovative design that facilitates logistics and maintenance, while delivering ...

Another year of growth in the utility-scale storage market also marked a second consecutive year of record lows in the installed cost of lithium-ion batteries. However, trade actions and changes to tax policy have the ...

Note: Photovoltaic solar energy includes utility-scale solar, rooftop solar and off-grid/distributed solar segments State wise utility scale solar and wind installed capacity in February 2025 In ...
