

Wind solar storage project financing options in Serbia 2030

What is the quota of wind power in Serbia?

At the first auctions, the wind quota was 400 MW while the one for photovoltaic projects amounted to 50 MW. There are seven applications in the wind power segment and 33 for solar power. At the first auctions there were nine and seven, respectively. Serbia changed both the price ceiling and the criterion for evaluating the bids.

How does Serbia encourage private investments in green energy?

Serbia offers several incentives to encourage private investments in green energy: Subsidies and Grants: The government provides subsidies for up to 65% of funds invested in energy efficiency measures in private households. This includes investments in insulation, new windows, and biomass boilers.

What is Serbia solar PV?

The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase. Articles, videos and more about our projects in Serbia.

What is UGT renewables Serbia solar?

UGT Renewables Serbia Solar is a ground-mounted solar project, which is planned over 2,000 hectares. The electricity generated from the Serbia Solar PV will offset 1,900,000t of carbon dioxide emissions (CO₂) a year. UGT Renewables Serbia Solar PV will be a 1,000MW solar PV power project developed in a single phase.

How many applications were submitted for market premiums in Serbia?

Forty applications were submitted for market premiums within the procedure for the second round of renewable electricity auctions in Serbia, Balkan Green Energy News learns. The call for wind and solar power projects was launched in late November and the deadline for applications expired on February 5.

What is the quota for wind power projects?

The available quota for wind power projects is 300 MW while firms applied for an overall of 673 MW. Bids for 498 MW in total were submitted for a solar power quota of 124.8 MW. The facilities would be bigger than the combined 1.171 MW from the bids because developers aren't participating with the entire planned capacities.

This and other analyses of investments in renewable energy sources arose as a necessity due to our involvement in some projects in financing and sale of renewable energy sources in Serbia. We have decided to share ...

Further to a 2023-2025 plan adopted by the Ministry, new wind power projects (minimum 3 MW approved
