

Wind solar storage tender price in Romania 2026

Is Romania launching a CfD scheme for solar & wind projects?

Romania's Ministry of Energy has officially approved a CfD scheme for solar and wind projects from 5 MW in size. The long-awaited mechanism was originally expected to launch last year, but the latest order reconfirms the first auction will be conducted this year, with a second auction before the end of the 2025.

Are wind and solar power projects eligible for subsidies in Romania?

Wind and solar power projects with a combined capacity over 1.5 GW in Romania are eligible for subsidies under a contract-for-difference (CfD) scheme. The first round of auctions resulted with ten and eleven winning bids, respectively.

How much does wind power cost in Romania?

The weighted average of accepted wind power prices is EUR 65 per MWh, compared to EUR 51 per MWh for photovoltaics. Officials in Romania are hoping that the EUR 3 billion approved from the European Union's Modernisation Fund will cover the costs of the new 15-year CfD mechanism for solar and wind power.

How much does a solar & wind project cost?

The two auctions are planning to tender a total 5 GW of solar and wind. As outlined in previous updates, the maximum strike price has been confirmed at EUR91 (\$99.51)/MWh for solar projects and EUR93/MWh for wind projects. The CfD agreement will be for 15 years from the date of commercial operation.

How much solar capacity does Romania have in 2023?

According to the latest market data, the Romanian solar PV market added more than 1 GW of newly installed capacity and scored a remarkable 308 % increase compared to the previous year's growth. Thus, Romania reached a cumulative solar capacity of 2.9 GW at the end of 2023. Romania Solar Resource Potential

Are wind and solar power projects eligible for contracts for Difference (CfD)?

Be the first one to comment on this article. Wind and solar power projects in Romania of over 1.5 GW in total are eligible for contracts for difference (CfD) after the first auctions.

In a significant development for India's renewable energy sector, a solar project integrated with energy storage has recorded a tariff of INR3.32 per unit--5.8 per cent lower than the rate discovered in a similar tender by SECI in ...

The BESS project is connected to a solar and wind project. Image: Monsson. We hear from renewables independent power producer (IPP) and energy trading firm Monsson about a recent BESS project in Romania

Wind solar storage tender price in Romania 2026

Moldova intends to launch a new tender this autumn for large-scale renewable energy generation and energy storage system (BESS) projects, with the specific auction ...

The government set a maximum strike price of EUR73/MWh for solar and EUR80/MWh for wind. Romania launched its first CfD auction in September 2024, offering up to 500 MW of solar and 1 GW of wind.

According to the Draft Government Decision, the Ministry of Energy will draw up CfD or ad-hoc CfD state aid schemes for the eligible generation technologies (i.e., onshore wind, offshore wind, solar, hydro, ...

Download SeeNext's analysis of the renewable energy industry in Southeast Europe here. Romania's inaugural CfD tender in 2024 allocated 1,096 MW of onshore wind and 432 MW of solar power capacity. The winning ...

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a EUR199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through ...

The Ministry of Energy of Romania has launched a EUR458m call for the development of around 950 MW of wind and solar projects, with or without integrated storage ...

Moldova intends to launch a new tender this autumn for large-scale renewable energy generation and energy storage system (BESS) projects, with the specific auction volumes and additional details yet to be determined ...

Supported by the EBRD, Romania has this week launched a Contract for Difference (CfD) mechanism for the construction of renewable energy installations and opened the first auction for 1.5 GW of renewable energy ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in northwest of the ...

In 2024, Romania organized its first CfD tender for 1,5 GW, out of which 1 GW for wind projects and 500 MW for solar. In terms of participation, close to 50 companies took part in the process, with 21 being declared winners, with ...

Romania has concluded its maiden auction round under the country's contracts for difference (CfD) scheme, selecting 1.528 GW of new solar PV and wind energy capacity. Winning prices were 20% to 30% lower than the ...

The Romanian Ministry of Energy successfully concluded its first Contracts for Difference (CfD) auction, awarding contracts for over 1,500 MW of new renewable energy capacity. A total of 21 ...

Wind solar storage tender price in Romania 2026

Romania this week has kicked off a contracts for difference (CfD) tender for 3.47GW of wind and solar capacity. Developers can submit their bids to transmission system operator Transelectrica by July 11. The price ...

Romania will hold its second contract for difference (CfD) tender by the end of the third quarter and will seek to award 1.47 GW of solar and 2 GW of wind power capacity.
